1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**Claim 11, third line from bottom**, change "they" to ---the analysis means---.

2. Claims 11-20 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art fails to show a device for determining the angular position over 360 degree wherein the sensor comprises a summing assembly having an output at which is generated an output signal (Vs), said assembly summing the electrical signal generated by the first probe and the electrical signal generated by the second probe, such that the output signal comprises discontinuities (d) corresponding to the discontinuities (D) of the electrical signal generated by the first probe and that the variation (Vv) of the output signal (Vs) between two

discontinuities (d) is less than the value (Vd) of the discontinuities (d) of the output signal (Vs), the analysis means are linked to the output of the sensor; the analysis means also include second means calculating the rotation speed of the rotary member. Because none of the prior art teaches or suggests this element, this feature, taken together with the other limitations of the claims renders the claims allowable over the prior art.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jay M. Patidar whose telephone number is 571-272-2265. The examiner can normally be reached on M-Thur 7:00-5:30.
